Sustainability & Environmental Responsibility Statement

LONG-TERM, STABLE GROWTH. CB AS A DEPENDABLE PARTNER

CB srl has grown continuously and stably since it was founded. The company thereby helps increase prosperity, while offering safe jobs with good conditions. CB srl keeps on developing new technologies and innovations, making it equipped to also tackle whatever lies ahead.

CB SRL, A COMPANY COMMITTED TO SUSTAINABLE DEVELOPMENT

Throughout the decades, CB srl, has been committed to a policy of social and ethical responsibility with four points of focus:

- Our cooking appliances and packaging machines are designed to last
- We go beyond the requirements to guarantee the highest levels of performance
- Our customers and partners are based world wide and we support them in developing a sustainable approach
- 100% of our machines can be repaired and more than 95% recyclable

STRONG COMMITMENTS THROUGHOUT THE SERVICE LIFE OF OUR PRODUCTS

CB's products are designed to last a very long time. The appliances can be recycled at the end of their service life due to the high degree of reusability of their components. As a result, we systematically avoid unnecessary material waste.

- The materials used for our machines are high quality and long lasting
- Our machines provide energy efficiency and savings throughout their service life
- 100% our machine can be repaired
- Spare parts are available for more than 10 years after a product is discontinued

CUSTOMER-FOCUSED PACKAGING

Wherever possible, we use recyclable or environmentally friendly materials for packaging our products. Wherever it makes sense, we use recyclable or environmentally friendly materials. We especially try to avoid plastic and foil wherever the specific product characteristics make that possible. The corrugated cardboard packaging used for our appliances consists of 75% recycled material.

- Reduction in packaging from design onwards and decrease in production waste
- Our products are more than 95% recyclable
- In our appliance packaging, the share of recyclable materials is 97%. Plastic and foil account for only 3% of the packaging weight

OUR ENGINE THAT DRIVES SUSTAINABILITY. OUR EMPLOYEES

Our employees have been the basis of our success in recent decades. To be successful we need the best and most satisfied people who are highly committed and dedicated every day to being there for our customers.

- An individual employee development policy and promotion of ethics
- Respect of International Labour Organisation standards
- In order to promote employees' health, all staff are offered regular services by the company doctor.

APPLIANCES THAT OFFER EFFICIENCY IN DIVERSE WAYS

ECOLOGICAL VALUE. In developing our products, we pay great attention to ensuring that they are as efficient as possible. As a result, our appliances save energy, water, cleaning chemicals, raw materials and time and reduce CO₂ in the preparation of food.

ENERGY SAVINGS: CB products help save energy compared to traditional cooking appliances

FOOD QUALITY: CB's mission is to offer people healthy, high-quality nutrition through the way our appliances cook food and preserve food. Healthy nutrition is not only about providing important nutrients – eating is about enjoyment and feeling good.

CONNECTIVITY: Connectivity is the key for a more sustainable world. Our state-of-the-art connectivity solution CB & Valko Synergy offers additional ways of optimizing the production.
